KNIGHT'S MODERN SEAMANSHIP
Six Edition

Revised by **John V. Noel, Jr.**,
Captain, United States Navy,
Commander United States Navy

Edited by **Frank E. Bassett**,
Commander United States Navy

For three quarters of a century, *Modern Seamanship* has been the standard reference work for all those who follow the sea as a profession. For years, it has been the textbook for students of the United States and other countries of the world. The book has been translated into many languages and is now being translated into Spanish. It has been the source of information for many authors about ship, boat, and the sea. Compiled by the former Assistant Department Head of the U.S. Naval Academy's Department of Seamanship and Navigation, with contributions from a distinguished group of naval officers and experts, the book is now completely revised, and expanded to reflect the most recent developments. A wealth of topics is included, including an up-to-date description of the most important developments in seamanship, cargo handling, navigation, at sea, and weather forecasts, instruments, and services.

(Continued on Next Page)

(Continued from Next Page)

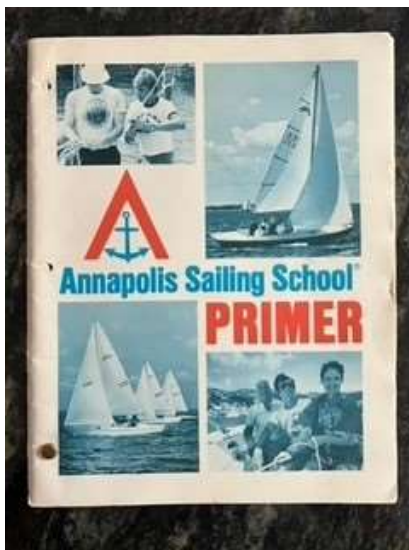

The latest basic and advanced topics are described and illustrated. An important new chapter covers the subject of pollution in inland waters, harbors, and the open sea. The new U.S. Coast Guard Emission Control Regulations are included for reducing pollution caused by boats and ships. Other changes in nomenclature of U.S. Naval vessels are reflected throughout the edition.

Knight's *MODERN SEAMANSHIP* continues to be the sailor's best friend and companion, providing all the information necessary for proficiency and security at sea.

ABOUT THE EDITORS

Captain **John V. Noel, Jr.**, United States Navy (Retired), former Assistant Head of the U.S. Naval Academy's Department of Seamanship and Navigation, has had a full and varied career. A sailing officer and writer published author, he assisted with previous editions of Knight's *MODERN SEAMANSHIP* and has written several other books that serve as standard texts and references for the Navy.

Commander **Frank E. Bassett**, United States Navy, has had command experience at sea in submarines, destroyers, and yachts. He is former chairman of the Navigation Department, U.S. Naval Academy.
